SKILLS

PROGRAMMING LANGUAGES: Java, JavaScript, Python, HTML, CSS, SQL

AI & FRAMEWORKS: Spring Boot, Flask, React, OpenAI, ClaudeAI

TOOLS & CLOUD: Git, JUnit, Microsoft Azure Cloud

LANGUAGES: Mandarin (Native), Vietnamese (Native), English (professional proficiency)

EDUCATION

MSc Advanced Software Engineering — King's College London

London, United Kingdom

Grade: Merit – 69%

Sep 2024 - Jan 2026

BSc Applied Software Engineering — Cardiff University

Cardiff, United Kingdom

Grade: Upper Second Class Honours (2:1) – 67%

Sep 2021 – Jul 2024

EXPERIENCE

STEM Ambassador — technocamps

Cardiff, United Kingdom

Oct 2021 – Jun 2024

- Delivered 100+ technical workshops on Lego Spike, Microbit, and Web Development to students across Wales.
- Mentored over 500+ young adults, simplifying complex CSS/HTML concepts to encourage careers in technology.

Web Developer — J&F Industries International Co., Ltd

Ho Chi Minh City, Vietnam

Jul 2023 – Aug 2023

- Designed and deployed a commercial website for a manufacturing firm using Spring Boot.
- Engineered a multilingual interface (English, Mandarin, Vietnamese) to expand the client's reach across 3 global markets.
- Managed cloud deployment on Microsoft Azure, ensuring 99.95% availability for the live site.
- Website link:** <https://www.jfrack.com>.

Student Academic Representative — Cardiff University

Cardiff, United Kingdom

Sep 2022 – Jun 2023

- Represented a cohort of 50+ students, gathering feedback to present at monthly Student Staff Panels.
- Collaborated with faculty to resolve key academic concerns, improving communication between students and department.

PROJECTS

LLM Code Translation & Test-driven Development (TDD) Dissertation

Feb 2025 – Aug 2025

- Engineered 5 different prompting strategies using Test-driven Development to improve LLM code translation accuracy.
- Evaluated performance across 3 programming languages, identifying how incorporating test cases into prompting strategies directly improves the performance of code translation by 35%.
- Utilised TDD to provide concrete behavioural expectations, resulting in more robust and functional translated codebases.

Student Information Chatbot

Jan 2024 – Apr 2024

- Collaborated in a team to build a RAG-based chatbot for 33,000+ Cardiff University students.
- Scraped 2,000+ pages of university web data using LlamaIndex to create a knowledge base for the chatbot.
- Integrated an admin dashboard using ClaudeAI for IT staff to analyse student query trends and improve information finding efficiency.
- Optimised data processing pipelines to achieve a response time of under 3 seconds for a seamless user experience.
- Website link:** <https://cu-chatbot.kavin.rocks>.

Energy Visualisation Project

Oct 2024 – Dec 2024

- Developed a full-stack application to visualise 5,000+ rows of CSV energy data into interactive, responsive charts.
- Implemented custom filtering logic allowing users to filter different data variables in real time.
- Build an admin portal for secure CSV imports, ensuring data sets remained 100% up to date.
